# RICHMOND-EUREKA MINES

While the United States company has not got its roaster plant ready to operate in connection with the bag house, as yet, a number of the lead furnaces are now being placed in commission to handle carbonate ores and by next week three furnaces will likely be going full tilt. It will be only a few weeks until the new roasting plant is ready to demonstrate its utility, and when that is done, the company's lead smelting works will be ready to go at their capacity of 1.200 tons per day.

Following is the daily market comment of Paine, Webber & Co., Boston, together with the range of prices of copper stocks and other Boston listings in which the west is interested, as well as a similar report on New York curb transactions, by James A. Pollock & Co., and from which it is secured for use in this department of 'The Herald'.

Boston, July 15.—We think this strong market will continue until it gets more active or until the sales in New York run up to 1.50,000 and 2,000,000 shares. The buying of Coalition was good all day, but on account of the large amount of stock of ered no advance was made. North Butte rallied easily, but sold off on profit takize. On any weakness buy Amalgamated, Union Pacific St. Paul, North Butte and Butte Coalition.

### STRIKE IN LOST JOSEPHINE Carbonic Acid Gas, Instead of Gold, Is Encountered at 45 Feet.

Provo, July 15 .- W. G. Williams of the Provo, July 15.—W. G. Williams of the Lost Josephine company has returned from the mine. He has brought some washings of gold with him, which show colors, and also samples of the conglomerate from which the gold is washed. President Singleton and Secretary Smoot expect to go out early next week.

The contractors on the shaft have struck carbonic acid gas at a depth of about forty feet, which necessitates a light from the mine. RE-ENAMELING The art way of fixing teeth. Let us show you how it is done.

Four carloads of ore from Utah mines were released from the Pioneer sampler The Taylor & Brunton sampling works yesterday reported the release of ten cars of ore from Utah mines and one from Idaho.

Manager D. P. Rohlfing says that opera-tions will be resumed at the Lulu com-pany's property in Beaver county within It is reported that forty carloads of ore have already passed through the samp-ling at the Tintic smelter. It is not ex-pected that smelting will begin till about the first day of August

the first day of August. William Ochs, who was instrumental in interesting the Salt Lake crowd in the rich copper properties now owned by the Salt Lake & California Copper company, in Del Norte county, is over from the coast again. He is now working on another deal involving Utah property.

Humboldt Star: C. A. Green, manager Humboldt Star: C. A. Green, manager of the Bloody Canyon antimony mines, was in town Saturday attending to business connected with the property. He stated that he was working two shifts in the mines and that eleven men were employed in and about the works. The smelter is running steadily and regular shipments of the products are being made

Humboldt Star: The smelter returns on a shipment of ore made recently from the Durango Girl mine at Rosebud were \$181.85 in silver and \$5.80 in gold per ton. This shows that Rosebud is far from being a dead one and is there with the goods when it comes to the production of high reads. The shipment was made from the grade. The shipment was made from the lease which A. F. Ford is operating on the Durango Girl property the Durango Girl property, owned by a Colorado company and situated in the Sulphur Spring section of the district.
